

**SOFTWARE/PROGRAMS**

**Languages:** ColdFusion, HTML, JavaScript, Oracle, VBSCRIPT, VISUAL BASICS 6, COBOL 11, OS/VS COBOL, MVS JCL, VISUAL C++, DB2/SQL, BASIC, MySQL, ASP, PHP, AJAX, Perl, Mason.

**PC Applications:**

DreamWeaver MX, SQL 7/2000, Visual Basics 6, Workbench (COBOL & CICS), Access, Oracle 8, Visual Interdev 6, Microsoft Windows NT, Microsoft Windows 95/98/ME/2000 PRO/XP HOME/XP PRO, Microsoft Office 2000/XP, Adobe PhotoShop 5.5/6.0/7.0, Fireworks MX, FTP programs, SecureCRT.

**FORMAL EDUCATION****2007 – WestLake training + development**

- Received certification following completion XML and Web Services with Advanced ColdFusion.

**2001 – Allaire, New York, New York**

- Received certification following completion of Fast Track to ColdFusion.  
- The course acquired knowledge in all areas of using ColdFusion.

**1999–2000 – The Chubbs Institute, Jersey City, New Jersey**

- Diploma in Computer Programming.  
- The Courses emphasis on creating a programmer logic mentality with multiple different computer languages and systems.

**OBJECTIVE**

To maintain and expand my experience in utilizing the ColdFusion programming language with it's available powerful features as well as advance my employer's productivity with up-to-date technologies.

**AREAS OF STRENGTH**

- Capable of improving and automating websites for increased efficiency
- Create debugging programs to improve website reliability
- Experienced in creating user-friendly database structured sites
- Proficient decision making skills, as well as, effective time management
- Adequate written and verbal communication skills, with strong leadership potential
- Transfer project proposals from client's requirements to project diagrams for site design and programming, as well as help clients to visualize their project from a design and programmer perspective
- Adapt with new technologies as they are presented such as (AJAX, CFAJAX, CFComponents, CFFunctions, and more)
- Great leadership, team, and project management skills

**PROFESSIONAL EXPERIENCE****ADP, Parsippany, NJ****2007 - Present****Webmaster**

- Redesign and re-write the code for a heavily used internal app from its original state since 1998.
- Helped other developer in writing mini-apps to an actively in progress new portal application.
- Maintained test server environment.
- Introduced new technologies to the group such as CFAJAX.
- Trained and tottered one of the existing developers.
- In progress of writing up a documentation on standardizing the coding environment for the developer and putting strict guidelines to follow in future coding.

**Hearst Magazines, Marketing & Audience Development Group Digital Media, New York, NY****2005 - 2007****Infrastructure Manager** (Previously Internet Marketing Programmer in the consumer marketing division)

- Oversee and manage the server structure.
- Make decisions in purchases and server maintenance projects.
- Insure server stability and functionality.
- Responsible for updating and maintaining subscription forms.
- Researched and used all available functionalities available through the CDS Fulfillment House for processing orders, gift orders, and many other functions, such as (AutoSubscribe processing, the iWS system also known as the WSDL integration processing, and FTP batch processing system).
- Working on automating many of the manual processes in place with as little human interaction as possible to minimize human errors and mistakes such as automating manual order process
- Replaced all references and uses to flat text files with the complex MS SQL database structure and automated data storage processing from having one database table to multiple to ease the separation of the different data entry systems such as sweepstakes.
- Modified the picking winners process for sweeps from having to run through multiple steps to picking out the winners to a click of a button from the sweepstakes manager rather than the programmers.
- Replaced costly third party emailing programs with CFMAIL function in sending notifications to subscribers of the order placed.

**PROFESSIONAL EXPERIENCE CONTINUED**

**VOX Solutions, Teaneck, New Jersey**

**2002–Present (part time)**

**ColdFusion Webmaster/Site Designer**

- In progress of developing a Meeting/Events management tool for Panasonic.
- Design new templates, create and maintain Internet/Intranet application using ASP/ColdFusion, CSS and HTML. The company's Intranet website is created to give employees and account managers the flexibility of using internal software from anywhere around the world by accessing the site online which connects to an SQL database capturing all the data related to each different project.
- Design web site layout, including navigation scheme, creating static and animate graphics using Adobe PhotoShop & Illustrator, ImageReady.
- In the process of learning Macromedia Flash and ColdFusion Flash Forms.
- Programmed an interactive Game for one of the company's client which resample Tic Tack Tow where depending on the poll answer an X or an O gets placed in the location of the question. Then the winner is rewarded points and prizes.

**2004–2005 (part time)**

**WebOnTheFly, Little Ferry, New Jersey**

**ColdFusion Webmaster/Site Designer**

- Work on updating and maintaining websites developed by the company.
- Use the company's software to add functionalities depending on the client needs.

**2001–2005 (part time)**

**RetailWire, LLC, Montclair, New Jersey**

**Computer Programmer/Website Developer**

- Created ColdFusion error-checking utility for company website to reduce error messages encountered by site visitors.
- Created ColdFusion code to record user navigation through the website; specifically tracks time of visit, order pages visited, and number of hits to particular pages.
- Create and maintain web applications and databases using SQL Server, MS Access products and MySQL
- Update and upload Internet configurations.
- Created a polling module with a complete back end administrative site with multiple reporting layouts.
- Designed and programmed an admin interface to allow the company's editors to add pages to the site without having to use or know anything about HTML.
- Created an e-Commerce website using ColdFusion for a well known Games and Playing Cards company.
- Designed and managed a fully interactive website shopping cart using session variables, and other methodologies.

**2002–2004**

**EGR International, New York, New York**

**Network Administrator**

- Worked with company employees to troubleshoot or guide them to figure their problems with their computer.
- Maintained company's on-site servers and email servers such as (SQL Server on Windows NT, Microsoft Exchange Server for emails).
- Responsible of configuring new employees as well as setting up new computers as well as old ones.
- Interact with primary contacts in Marketing and Sales as well as other related departments.
- Assist in other areas, as assigned.

**2001–2001**

**IdeaBeat, LLC (Currently retailwire.com) Nyack, New York**

**ColdFusion Webmaster/Site Designer**

- Updated and maintained database contents.
- Created relational diagrams which relate to database functions.
- Advanced my knowledge of CSS and HTML, including creating frames and tables nesting.
- Advanced my knowledge of ASP and ColdFusion languages.
